- Develop all type of programming tasks necessary for production/operation of existing Yokogawa CentumVP Distributed Control System (DCS)
- Implement engineering solutions
- Take care of cyber security
- Provide input to technical team
- Handle and develop existing documentation of instrumentation
- Coordinate the instrumentation and control project procedures
- Coordinate the tasks with Yokogawa Hungária Kft.
- Produce Test Procedures
- Produce Detail Design Specifications
- Produce DCS and HMI configuration

Skills / Qualifications

- Degree in Engineering
- Familiar with Yokogawa CentumVP
- Technical experience of Profibus
- Knowledge of industry standards related to DCS implementation
- Fluency in English
- Good communication skills, team working
- Planning and time management skills
- Ability to work under pressure and prioritization of tasks
- Driving license "B"

Advantages

- Programming knowledge of Siemens S7 300 PLC
- Experience in Metrology
